INTRODUCTION

We are pleased to provide the 2025 **Arkansas Blue Cross and Blue Shield Blue Choice Formulary** as a useful reference and informational tool. The **Blue Choice Formulary** can assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The **Blue Choice Formulary** is reflective of current medical practice as of the date of review.

The information contained in this **Blue Choice Formulary** is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This **Blue Choice Formulary** is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the **Blue Choice Formulary** is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at <https://www.ahrq.gov/gam/>.

PREFACE

The **Blue Choice Formulary** is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action.

Individual pharmacy benefit plans may impose restrictions or not reimburse some products. In addition, over-the-counter (OTC) products, with the exception of insulin and diabetes monitoring products, are usually not included in the pharmacy benefit. Pharmacy law requires a valid prescription for purchase of needles and syringes in certain states. OTC products are listed for informational purposes. If covered in the pharmacy benefit, OTC products require a valid prescription.

Drugs represented in the **Blue Choice Formulary** may have varying cost to the plan member. Prescription benefit plan may alter coverage of certain products or vary copay amounts based on the condition being treated. Generic medications typically are available at the lowest cost, brand-name medications on the **Blue Choice Formulary** will generally cost more than generics, and brand-name medications not on the list will generally cost the most.

The tiered format places drugs into tiers or levels of cost sharing by the plan member in the following manner:

AGE - Prior Authorization applies for members age 35 and older **MB** - Medical Benefit **OTC** - Over the counter **PA** - Prior Authorization **PA*** - Prior Authorization may apply **QL** - Quantity Limits **SGM** - Specialty Guideline Management **ST** - Step Therapy

TIER	DESCRIPTION
------	-------------

Tier 1:	Lowest plan member copayment: All generic drugs , including those on the Blue Choice Formulary .
---------	--

Tier 2:	Intermediate plan member copayment: Preferred brand-name products on the Blue Choice Formulary selected for Tier 2.
---------	--

Tier 3:	Higher plan member copayment: Brand-name products on the Blue Choice Formulary not selected for Tier 2, and all non-preferred brand-name products. In most cases, there will be reasonable alternatives in Tier 1 or Tier 2 for products found in this highest tier.
---------	---

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve clinically effective drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

Arkansas Blue Cross will utilize the services of the independent National P&T Committee as well as internal pharmacy and medical advisory committees to direct formulary decisions as it relates to our benefit certificates and policies.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product.

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug. Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.

AGE - Prior Authorization applies for members age 35 and older **MB** - Medical Benefit **OTC** - Over the counter **PA** - Prior Authorization **PA*** - Prior Authorization may apply **QL** - Quantity Limits **SGM** - Specialty Guideline Management **ST** - Step Therapy

LEGEND

Abbreviation	Description
AGE	Prior Authorization applies for members age 35 and older
MB	Medical Benefit
OTC	Over the counter
PA	Prior Authorization
PA*	Prior Authorization may apply
QL	Quantity Limits
SGM	Specialty Guideline Management
ST	Step Therapy
delayed-rel	Delayed-release (also known as enteric-coated), refer to the reference brand listed for clarification
ext-rel	Extended-release (also known as sustained-release), refer to the reference brand listed for clarification
